

EDUCATION

NATIONAL DONG HWA UNIVERSITY

Sep 2019-July 2024

Computer Science and Information Engineering

GPA: 3.74

SKILLS

Technical: Python, SQL, APIs, Machine Learning, Pandas, Numpy, Matplotlib, Seaborn, Scikit-learn, Probability and Statistics, Excel, Power BI, HTML, CSS, JavaScript

Analytical: Critical Thinking, Problem Solving abilities, Research Skills

Interpersonal: Communication, Collaboration, Continuous Learning

Languages: Mongolian (native), English(fluent), Chinese(intermediate)

RELEVANT EXPERIENCE

NDHU Reviews

Sep 2022- May 2023

- Worked closely with a partner and a supervisor to design and develop a comprehensive web application that allows NDHU students to read and write detailed reviews about any course they have taken, facilitating informed course selection.
- Contributed to a project that empowers students to make better academic choices and enhances the overall learning experience at NDHU.

VIP Happiness

Oct 2023- June 2024

- Collaborated with students from the psychology department to develop a web application designed to collect survey data from students participating in various campus activities.
- Participated in regular meetings to discuss project progress, upgrades, and address mistakes.

Future Coders Lab

Aug 2024- Present

- Managing a project to teach teenagers fundamental computer science concepts, including how to build basic websites and create simple games.
- Designed lessons covering HTML, CSS, and JavaScript to equip students with essential web development skills.
- Aimed to inspire and help students explore potential career opportunities by giving them a strong foundation in technology and problem-solving.

PERSONAL PROJECT

Youtube Views Prediction

- Utilized the YouTube API to gather comprehensive data on video metadata, including metrics such as views, likes, dislikes, comments, and engagement statistics.
- Conducted thorough data cleaning and preprocessing steps to ensure the dataset's quality and consistency for analysis. Employed exploratory data analysis to identify relationships, distributions, and correlations within the dataset.
- Evaluated multiple machine learning algorithms to predict video views effectively. Used techniques like cross-validation and metrics to select the best-performing model.

Ultimate Expense Tracker

- Developed a personalized expense tracker featuring budget planning, expense tracking, and a dashboard to monitor financial health.
- Incorporated real-time calculations and graphical representations for income, expenses, and savings, tailored to a chosen timeline.
- Implemented detailed data tracking and visualization to enhance budgeting accuracy and improve financial decision-making.

Flight Price Prediction

- Gathered flight price data, cleaned it to handle missing values and outliers, and standardized features for analysis. Implemented and fine-tuned regression models to predict flight prices, evaluated model performance.

ADDITIONAL EXPERIENCE

Salt Lick Restaurant

Aug 2021 - Sep 2022

YiYuan Resort

Jan 2023 - April 2024
